PROFESSIONAL EXPERIENCE

Mirza Biryani, London NW9 0BY **Solo website developer & graphics designer** Aug 2024 - Present

- Designed virtual menus to be displayed in venue & planned to be used in future establishments. Main intent being to captivate and provide a great customer experience, boosting order flows by 12%.
- Co-operated with current designers to plan design ideas for business' website in order to improve its' presence online.
- Developed company's website (Full stack Development) along with software development of a functional delivery system & integration with current EPO technologies, increasing sales by 20% & contacts for catering by 30%.

Gorilla Techs Ltd, London EC1R 3BT **Role: Office Admin Assistant** Jul 2023 - Aug 2023

- Collaborated with multiple members to review & fulfil customers' orders, increasing business' productivity by 15%.
- Oversaw warehouse inventory and re-organizing products to ensure business functionality and up-keeping productivity.

RELEVANT EXPERIENCE

North Starts Nursery, London NW9 0RA **Role: Assistant Teacher** Jul 2022 - Jul 2022

- Had to safeguard children during the day, along with aiding teachers in multiple tasks, such as keeping classrooms organized and a child friendly environment.

PROJECTS & EXTRACURRICULAR

Encode 2024's Winner for 'Best cryptography for society' Oct 2024

- Deemed winner for 'Best cryptography for society' for Nethermind's bounty, by crafting an image-based encryption tool with potential in the Blockchain, called 'Imagica'.

Website Development Jan 2024 - Present

- Built front-end & back-end websites through the usage of HTML, CSS & JavaScript. I was able to create responsive websites using the Bootstrap framework, whilst creating backends with Python's Flask micro-framework and integrating an SQL database, thus ensuring functionality & compatibility with multiple devices.

Leadership experience Sep 2022 - Dec 2023

- Senior prefect for events in St. Gregorys' Science College, responsible for organizing & helping to run school-related events.

Software Development Hobby Sep 2022 - Present

- Utilized languages, such as Python, Lua and others to develop small-scale programs with both backend and frontend during my free time, ranging from simple automation applications to full-scale projects, developing my skills in software engineering and other languages unknown to me, ranging from Java to C# as an example. Most of my projects are available to view at: <https://github.com/Kevin-CNC>.
